Address

Manchester, United Kingdom

Education

BSc(Hons) Software Engineering

Manchester Metropolitan University

2:1

Loreto College

IT (Distinction*)

Business (C)

Sociology (B)

Skills

Languages

- JavaScript, HTML, CSS, Java, PHP, MySQL,

Frameworks

- React, Vue.js, Bootstrap

Developer Tools

- Git/GitHub, AWS, Postman, Firebase, Visual Studio Code

Soft Skills

- Problem Solving
- Cross-team collaboration
- Agile Methodologies
- Communication
- Project Management (Trello, Jira)

Software Engineer

Omar Jeylani

A passionate software engineer with a solid foundation in web development and a growing proficiency in modern frameworks like React and Vue.js. Skilled in creating user-friendly software with a focus on problem-solving and learning. Seeking an opportunity to contribute to innovative projects while advancing my skills and delivering measurable value to the organization.

Experience

2023-2024

Arden Insurance | London

Junior Software Engineer

- Designed and implemented a dynamic form using Vue.js that adjusts based on user input. For example, selecting "Car Insurance" displays relevant fields like "Car Make" and "License Plate" while hiding unrelated fields. This made the form more user-friendly and improved the accuracy of submissions.
- Simplified form workflows by removing redundant fields and unnecessary steps. For instance, the form now skips coverage details for users selecting the "Basic Plan," optimizing completion time and efficiency.
- Collaborated in agile environments, such as participating in daily stand-ups to address blockers and sprint planning meetings to prioritize backlog items. Delivered a fully functional prototype within a sprint cycle, contributing to faster project delivery.
- Worked closely with UI/UX designers to ensure the dynamic form aligned with the company's branding and usability standards. For example, added tooltips to guide users through complex insurance terminology, improving customer satisfaction.

2022

Fanatics UK | Manchester

Internship

- Engaged in hands-on development tasks as part of a sandwich placement, contributing to various IT projects under the guidance of experienced professionals.
- Acquired practical experience with industry-standard practices, including version control and collaborative development.
- Supported the IT team in resolving technical challenges and optimizing workflow

Projects

Marsae Website | HTML, CSS, JavaScript

Created and designed a fully-structured web app independently for an Airbnb business, featuring a navbar, company information, and an interactive "Contact Us" form for user engagement.

Film Database Web App | MySQL, JavaScript, API

Developed a film database web application with full CRUD functionality, leveraging RESTful web services to exchange data in JSON formats.

Chrome Extension | HTML, CSS, JavaScript, GoogleStore

Created a Chrome extension designed to allow you to save and organize URLs across categories like Books, Electronics, Pets, Health, and more.

More projects can be found on [GitHub](#).
